

## **SEEND PARISH COUNCIL ACCESSIBILITY STATEMENT**

### **Public Sector Bodies (Websites and Mobile Applications) (No.2) Accessibility Regulations 2018**

The Regulations came into force on 23 September 2018 and implement the EU Directive on the accessibility of websites and mobile apps of public sector bodies. The purpose is to improve the accessibility of public sector websites (including Parish Council sites) so that they can be used by as many people as possible – this builds on the existing obligations to disabled people under the Equality Act 2010 and the duty to make reasonable adjustments for disabled people.

#### **Accessibility Statement for Seend Parish Council Website**

This website is run by Seend Parish Council. We want as many people as possible to be able to use this website. The website layout and text has been made as simple as possible to understand. Visitors should be able to navigate the website using just a mouse, mouse pointer and keyboard. There may be some older documents (eg, archive minutes) that have been scanned and may not be fully accessible to a screen reader. There are also links to external websites for which the Parish Council has no responsibility for.

The government has produced an excellent guide for disabled computer users. This can be found at AbilityNet (<https://mcmw.abilitynet.org.uk/>). It has detailed advice on making your device easier to use. This covers such things as making your screen images and text larger, using a text reader to convert text to sound, using Voice Recognition to control your computer, increasing mouse pointer sizes etc.

#### **Technical Information about this website's accessibility**

Seend Parish Council is committed to making its website accessible, in accordance with the Public Sector Bodies (Websites and Mobile Applications) (No 2) Accessibility Regulations 2018. This website is partially compliant with the Web Content Accessibility Guidelines version 2.1 (<https://www.w3.org/TR/WCAG21/>) AA standard.

Following a detailed examination of our website's features against the detailed government checklist we have unfortunately identified some areas where we are not yet fully compliant.

- It is not possible to navigate the website purely by keyboard.
- There is only one way to find content (i.e. no search engine).
- ARIA\* (see below for definition) markup has not been used.
- Where extra content is shown or hidden on focus, it cannot be dismissed, interacted with (and not disappear when the user moves to it) and does not stay visible until dismissed by the user.

These items have been discussed with our Website designers who are currently working on a rebuild which will incorporate ARIA markup standards and make us fully compliant.

### **\* Definition of ARIA:**

WAI-ARIA, the Accessible Rich Internet Applications Suite, defines a way to make Web content and Web applications more accessible to people with disabilities. It especially helps with dynamic content and advanced user interface controls developed with Ajax, HTML, JavaScript, and related technologies. Currently, certain functionality used in Web sites is not available to some users with disabilities, especially people who rely on screen readers and people who cannot use a mouse. WAI-ARIA addresses these accessibility challenges, for example, by defining new ways for functionality to be provided to assistive technology. With WAI-ARIA, developers can make advanced Web applications accessible and usable to people with disabilities
